RETURN

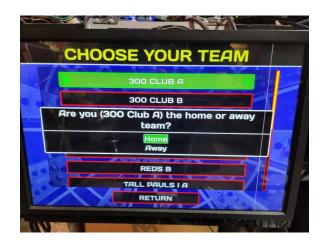

Choose "league mode" on the dart board

Then select "play league"

Now choose your specific league code RIPTUE or RIPTHU

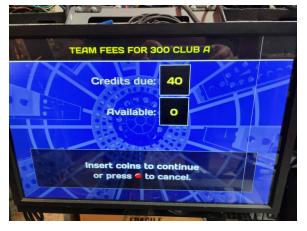

Find your team and select it from the list

The board will then ask if you are the home team or away team. Choose the option according to the schedule.

The board will then show your team members. Please confirm that you have selected the correct team (no need to add subs here. This is strictly for league fee purposes)

Please put teams fees (\$10) in the board now.

The credits due will go down as it issues credit for the money you put in the board.

Now the Away team will confirm their players and put teams fees in the board.

Then choose "Start Match"

Only 1 player from each team will be on the stats page.

Arrow up or down to put the green arrow next to the player name.

Once the green arrow is next to the player's name....hit the red button to pull up the stats window.

You don't need to enter any values for the handicap. Just confirm a zero for this field.

The next selection is the score. YOU MUST ENTER A SCORE OF 1 FOR EITHER TEAM'S PLAYER. If you don't, then there will be no record of the money put in the board.

It doesn't matter which player gets the score but if you do it in the first team then you can skip passed the second player.

After you get through the score entry and both players, you will see this screen. Please confirm again that one player has a score of 1. [if not, you'll need to go back (up arrow) to fix the score] If it is all correct then hit the red button to finish.
